

Hypnosis Show Requirements

Gavin Hooper

The sound system setup is extremely important for a successful hypnosis performance.

1. STAGE MONITOR is required which can be 1 monitor (speaker) facing the volunteers (2 monitors are better. This ensures the volunteers can hear everything properly and go into trance.)
2. TWO (2) professional quality powered speakers facing forward toward the audience, preferably on poles or stands.
3. Mixing board to connect a Microphone and Bluetooth receiver Gavin will have his own wireless microphone and BT device that can be hooked into your system. The Plug in requirements for each unit is: Microphone: this has a XLR output or a 1/2" jack, the cable must be able to be plugged into the mixing board. Gavin's music cues are sent through a bluetooth receiver **that must be within 100 feet or closer to the mixing board**. The Bluetooth device will require a plug configuration of either RCA 1/8 inch audio cable to a 3.5mm audio plug in or RCA to XLR or 1/2" plug.

Clarity of sound is extremely important for a successful hypnosis show. If you're using a DJ please have him / her arrive at least 60 minutes prior to the guests arrival or hypnosis show start time for sound checks.

Stage Hypnosis Performance: A section of floor can be used instead of a stage (and is preferred over the use of risers see below) The floor space must be in an open area that is clearly visible to the audience. i.e, a gym, ballroom or conference room dance floor.

Hypnosis and Risers: Risers must be solid with no spaces or cracks in-between the sections. The back of the riser must be against a wall (not curtain) or have a railing in the back. This makes it safer for the volunteers. There should be no space between the back of the riser and the wall unless a back railing is used.

Chairs: 20 chairs, Stacking Armless Chairs (not folding as the volunteers could get pinched as they are so close to each other) Chairs should be arranged in an arc if possible, if not a straight line with room for Gavin to walk behind. Please see the diagram below for stage plot.

A Stage Hypnosis show requires audience participation. The bigger the audience the more fun the show becomes. Gavin wants you and your guests to have a great experience, so please have your team and guests seated and ready to watch and or participate at the start of the performance.

NO Surprises Please: Hypnotists aren't always a welcome surprise, therefore your guests, employees, friends etc must be made aware that a hypnotist will be at your event a minimum of two weeks prior or longer is strongly suggested. A hypnotist at your event should not be a surprise to anyone as it can and will scare some people due to different beliefs etc.

Very Important: Hypnosis is a willing and wanting state of mind, on and off stage, it is for people who are willing to volunteer and want to experience hypnosis first hand.

Please note it's Volunteer NOT "VolunTOLD" If people are pressured or manipulated in anyway made to feel as if they should or have to volunteer, it will not work for them and could have an adverse effect on the entire performance.

Hypnosis works for everyone, Everyone who wants to be hypnotized and allows it to happen that is. I love hypnosis and people, but if I could force people to do my bidding... Lets face it; I'd be robbing banks for a living lol.

See you soon, lets have a lot of fun.

Hypnosis Show Requirements / Stage Plot

Gavin Hooper

Back of stage must be flush against the wall or have a back railing. Drapes / pipes are not considered to be a back wall.

- 20 (non-folding) chairs
- 2 Professional Grade Powered Speakers
- Mixer Board - minimum 4 outputs
- 1 or 2 Monitor / Speakers (2 is best)

Stage Width 30 Feet
